DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 1, drawn to method for identifying a polynucleotide.

Group II, claim 3, only as drawn to method for identifying an inhibitor or stimulator of transcription and/or translation.

Group III, claim 3, only as drawn to method for identifying an inhibitor or stimulator of activity of a polypeptide.

Group IV, claims 4-5, only as drawn to inhibitor or stimulator of transcription and/or translation.

Group V, claims 4-5, only as drawn to inhibitor or stimulator of activity of a polypeptide.

Group VI, claims 6-16, drawn to polynucleotide construct, vector, cell.

Group VII, claims 17-24, drawn to products containing NOS inhibitor and a DNA damaging agent.

Group VIII, claims 34 and 38-42, drawn to method of treating a host suffering from cancer by administering to the host a NOS inhibitor and a DNA damaging agent.

Application/Control Number: 10/049,428

Art Unit: 1636

Group IX, claims 35-42, drawn to method of treating a host suffering from cancer by administering to the host a DNA repair enzyme inhibitor and a DNA damaging agent.

Group X, claims 46-47, drawn to products containing a NOS inhibitor and a PI 3-kinase inhibitor.

Group XI, claims 48-50, drawn to method of treating a host suffering from retroviral infection.

The inventions listed as Groups I-XI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

PCT Rule 13.2 requires that unity of invention exists only when there is a shared same or corresponding technical feature among the claimed inventions. The inventions listed as Groups IV-V, VII, and X do not relate to a single general inventive concept because they lack the same or corresponding special technical feature. The potential special technical feature of these groups are NOS inhibitors which is shown by the International Preliminary Examination Report of record (reference D4 for example) to lack novelty or inventive step. Each of the remaining groups has a different potential special technical feature not shared by the remaining groups drawn to different structure and/or function for the product groups and different method steps not in common for the method groups.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1636

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Certain papers related to this application may be submitted to Art Unit 1636 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)). The official fax telephone number for the Group is 571-273-8300. NOTE: If Applicant does submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily

Art Unit: 1636

from 6 am to midnight (EST). The toll free number is (866) 2179197. When calling please have your application serial or patent
number, the type of document you are having an image problem
with, the number of pages and the specific nature of the
problem. The Patent Electronic Business Center will notify
applicants of the resolution of the problem within 5-7 business
days. Applicants can also check PAIR to confirm that the
problem has been corrected. The USPTO's Patent Electronic
Business Center is a complete service center supporting all
patent business on the Internet. The USPTO's PAIR system
provides Internet-based access to patent application status and
history information. It also enables applicants to view the
scanned images of their own application file folder(s) as well
as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.

Any inquiry concerning rejections or objections in this communication or earlier communications from the examiner should be directed to Terry A. McKelvey whose telephone number is (571) 272-0775. The examiner can normally be reached on Monday through Friday, except for Wednesdays, from about 7:30 AM to about 6:00 PM. A phone message left at this number will be

Application/Control Number: 10/049,428

examiner returns to his office).

Art Unit: 1636

responded to as soon as possible (i.e., shortly after the

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Remy Yucel can be reached at (571) 272-0781.
